Welcome

At Your Tech, we believe brilliant automation is based on the concept of the "Internet of Things." The newest generation of technology and devices interact together for unlimited possibilities.

A homeowner is faced with many choices when shopping for home automation. The best advice we can give is not to pay attention to brands but to programming skill. No matter which brand you get, whether it is Crestron, Savant, Leviton, RTI, Elan, or Control4, all are essentially the same. Each system has inputs and outputs that are programmed to interact with other systems creating a powerful control system. Unlike most integrators, we service all brands.

Our programmers have extensive programming and IT skills coming from past backgrounds in web design, graphic design, network engineering, construction management, automated drafting and many other trades.

Estimate Definitions

The following definitions have been customized specifically for your project.

Savant Automation System

Home automation is the use of one system to control basic home functions and features automatically and remotely from any mobile device.

24 Speaker Whole Home Audio System w/ Doorbell

Bring Savant music throughout the house. This package includes a standard doorbell which will play over the speakers. The doorbell sounds are completely customizable allowing upload of any audio file.

1 - True 7.1 Surround Sound

Lucky rooms will have the true 7.1 surround sound experience when watching TV. This package includes an in-wall subwoofer, thirteen-speaker sound bar, as well as four ceiling speakers for rear and mid-range sound.

1 - True 13.2 Surround Sound

Extreme media rooms will have the true 13.2 surround sound experience when watching TV. This package includes two in-wall front and rear subwoofers, thirteen-speaker front sound bar, four ceiling speakers for rear and mid-range sound, as well as 4 presence speakers in the room's corners for amazing sound immersion.

2 - Touchscreen Remotes

You'll use these award-winning remotes to control video, audio, lighting, climate, security and more. You can also use any phone or mobile device to do all with one simple, unified interface.

Whole Home Consulting Purchase / Install

The easiest electronics installation package where we'll install all your home's electronics. This includes TVs, computers, phones and more. Any parts required to install like wall mounts, cables and surge protectors are included! We'll create a shopping list of the best electronics that work with our control system and even shop for and pick up the items for you.

6 Zone - Personalized Video Matrix

This package provides centralization of all source equipment (DVD, set-top box, Roku, etc.) in a media rack. All TV's in the home can tune into any source.

A centralized video system allows the TV's to be mounted cleanly with no equipment behind the TV, resulting in ultra-thin TV installations and even framing of TV's.

Whole Home Structured Wiring

All the wiring, whether it's in your walls or not, is included.

1 Zone - Landscape Audio Package

This package includes an outdoor speaker system that delivers perfectly even coverage and unbelievable sound quality outdoors. Described by one critic as outdoor sound to "knock their socks off", Sonance provides jaw-dropping sonic performance from small satellite speakers and subwoofers that are hidden completely out of sight amongst plants and under foliage. Each zone includes 8 speakers and 1 underground subwoofer and is a necessity for any audiophile!

4 Zone - Color LED Landscape Lighting

With this system, one's attention is immediately drawn to the glow cast by color selectable LED lamps. Blue light with a water-ripple effect shines on the surrounding landscape, giving the impression that just a few steps into the landscaping will reveal a moonlit pond.

5 Zone - Advanced Networking Equipment

Did you know a standard home router is only able to handle 255 devices on a network? Our systems can handle thousands of devices and are unique in that we program them to automatically reboot routers and access points if the internet is unable to find Google. We take great pride in saying that you'll always be connected; we guarantee coverage even on the grass.

4 - Climate - Thermostat

Our thermostats replace the controls offered by the HVAC installer. Our touchscreen thermostats are not your standard thermostats; they double as Savant Controllers of anything in your home connected to Savant.

1 - Garage Door Integration

This feature allows you to close and open your garage door remotely and includes your garage in automation programming. With this add-on, we can program a garage TV to show the security display every time you pull into the garage and much more.

Motorized Shades - Install & Integration

This includes programming and integration with motorized shades installed by us or others.

Pool Integration

Our pool integration is customized specifically for your pool's features. They allow quick and easy control for using features and setting temperatures. The pool company must use Jandy or Pentair pool controllers.

Lanai Shutter / Screen Integration

This includes programming and integration with motorized screens and hurricane shutters installed by others.

Whole Home Lighting System w/ Panel

Our entire home lighting system can be designed many ways. Our keypads can be used to operate lights, audio, security and virtually anything. We will provide all parts and work with your electrician to install our parts. We also offer integration with systems by others.

Security System - Basic & Fire Alarm System - Basic

This security system will have every door and window covered. Fire and carbon systems will be installed per local code requirements. Secure modes will work while home or away. Arm and Disarm remotely using the Savant app.

AVAILABLE UPGRADES: Advanced system with audible announcements over the home audio speakers, and every sensor can be used to create powerful automation tasks.

Pool Alarm Buttons

Buttons will be located at all entrances to pool area. Pool system will be installed per local code requirements. Arm and Disarm remotely using the Savant App.

5 - HD Security Cameras - IP

Our system includes 4 TB of storage for months of recording with motion-triggered higher resolution recording.

1 - Doorbell Intercom W/ Mobile App

Video intercom with mobile app. Answer your door from anywhere, even while not at home.
